

Marble + Honeycomb Composite Tiles

Marble + Aluminum Honeycomb Composite Tiles (Laminated Tile)

This laminated tiles is the Aluminium Honeycomb backing to be laminated with thin Marble tiles through our latest working process. It is one of the most popular decoration and building material in the market.

This laminated tiles has the nature marble sheet as surface, and the Aluminium Honeycomb as supporting backside. It is one of the most popular decoration and building material in the market.

Product Feature - compared with common traditional tiles:

- 1) Lightweight: The standard honeycomb laminated tiles only weigh 1/4 of nature marble tiles.
- 2) Heat insulation and sound insulation - Energy saving and environment friendly.
- 3) Much stronger and more durable.
- 4) Easy for installation and transportation.

The marble + aluminum honeycomb laminated tiles are suitable for ceiling, interior & exterior wall cladding, desktop, and so on.

This kind of laminated tiles can be installed by adhesive or they can be mechanically anchored depending on the size of the pieces and the application. A different method and adhesive is used if tiles are going to be installed indoors versus outdoors.
